Concerns for the Doctor:

_____ **Ultrasound Patients (initial):** Please understand that a close shave is required in order to get the most accurate image of the body cavity. Feel free to ask us if you have any questions. Thank you for your understanding.

For the most beneficial patient care, animals should be dropped off and picked up during normal business hours. If not feasible, advise our staff and prior arrangements may be made with Advanced Critical Care (attached to our lobby through the glass door).

Please keep in mind that ACC is a separate practice occasionally providing a courtesy service for extended hours. Any questions regarding your pet's medical care should be directed toward a Veterinary Cancer Group team member.
